Abatement

CONTRACT TYPE

Specialty Contractor

PROJECT OWNER

The Connecticut
Department of
Transportation

LOCATION

New Britain, CT

The New Britain to Hartford Busway Station Project was the initial contract awarded as part of the \$500M CT fastrak Project. The project included the construction of a new Bus Station Facility including all site development, site infrastructure, an architectural pedestrian canopy, station supervisor building, demolition of an old multi-span freight railroad bridge, construction of a new 640 ft long dedicated busway bridge over RT 9, highway offramp widening, and intersection reconstruction.

Manafort went on to also be awarded two more bridge reconstruction projects, the Flatbush Avenue on ramp Viaduct and the Broad Street Bridges in Hartford, bringing Manafort's total involvement in the CT fastrak Project to over \$54M. All work was completed on time and on budget. Manafort served as Prime Contractor for the project and also self-performed excavation, cast-in-place concrete foundation, demolition, bridge, infrastructure, road, and highway work.
